Cyber3 Delphi Web Tool Meeting Minutes

Project Name: Cyber3 Delphi Web Tool
Client Name: James Crabb
Date: 26/9/2024
Time: 5:00pm-5:30pm
Location: Teams Meeting
Attendees:
- James Crabb
- William Heinecke

Discussion Topics:
- Updating on what we have done since last meeting
  - Functional Requirements
  - Non-Functional Requirements
    - Discussed potential additional non-functional requirements
      - Speed if survey size is large
  - Use Cases
- Clarification on profile creation / and how the user should be able to access the surveys
- Confirmed that result analysis would be a stretch goal / extra feature
- Showed the tool like what we are trying to build (Welphi)
  - Differences could be that our product will be free to use and open source
- Discussed research papers found during research for project background
  - One used Welphi for a survey process
  - Noted that there is more theoretical papers than practical papers published
- Talked about a new potential replacement for Node.js (Deno 2).
  - Node might be a more secure framework than deno since it has been around longer
  - Advantage for deno 2 is native typescript support
- Talked about testing in the future after the prototype is made
  - Small group testing to get feedback on design

Next Steps:
- Finish the project requirements and specification documentation

Next Meeting
- Date: 3/10/2024
- Time: 5pm
- Location: Teams Meeting
